1. Introduction
2. Using the Abrites diagnostic for DAF

1. Introduction

“Abrites Diagnostics for DAF” is a Windows PC based diagnostic software for DAF vehicles. With the help of this software you can perform complete diagnostic operations of all vehicles.

For proper operation of your diagnostic software you will need a corresponding interface for connection between your PC and vehicle named “AVDI”.

AVDI is an interface produced by Abrites Ltd. intended to act as an interface between the PC and the electronic control units.

AVDI should be used with ABRITES software produced by Abrites Ltd.

ABRITES is a trade mark of Abrites Ltd.

2. Using the Abrites diagnostic for DAF

The Abrites diagnostics for DAF is installed together with the rest of the Abrites diagnostic software applications as a part of the Abrites diagnostic suite provided to the user via e-mail.

The user can start the software by clicking on the appropriate icon from the Abrites “Quick start” menu.

Once the DAF icon is selected the software will start and the user will see the following screen:

The ABRITES Diagnostics for DAF is a software application designed for vehicles from the DAF Motors group.

The advanced diagnostic features include the option for key learning – allowing us to learn keys to the DAF trucks mentioned below.

Key learning by OBDII. Pin code not needed. Supported models are from 2002 to 2008.
