AVDI SOFTWARE included in the Annual Subscription

The AVDI (Abrites Vehicle Diagnostics Interface), combined with the Annual Subsciption, offers a comprehensive suite of functionalities essential for professional locksmiths and automotive technicians.

This powerful premium tool provides advanced capabilities such as key programming, module adaptation, ECU programming and coding for various vehicle makes and models. Fully customizable, the AVDI can be upgraded with additional software licenses tailored to your specific needs and area of expertise.

General Diagnostics

- Complete vehicle diagnostic scan for all supported car brands
- Read and clear diagnostic trouble codes (DTC)
- Display live values from the modules of the vehicle
- Perform Input/Output actuator tests
- Service interval reset

PassThru compatibility

- J2534 PassThru driver compatible with the international SAE standards
- Emulation of different interface units to access 3rd party software products and original equipment manufacturer software products such as VW/Audi/Seat/Skoda/Bentley/Lamborghini ODIS, Toyota/Lexus/Scion Techstream, DAS/Xentry – Star Diagnosis, BMW - E-Sys, INPA, EDIABAS, NCS Expert, NFS and many others

Included licenses: PT002

Explore and enhance your AVDI by browsing the available upgrades in our online store!

℅ Key Programming

- All keys lost and spare key programming and EZS password extraction for all DAS3/FBS3 Mercedes-Benz vehicles via OBDII (e.g. W204/W207/W212/W218/W220/W221/W176/W164 and others)
- All keys lost programming and EZS password extraction for all DAS 2/ DAS 2a/ DAS 2b Mercedes-Benz vehicles by dump from IFZ/WSP and via OBDII (e.g. W168/W163/W202 and others)
- Enable and Disable key positions

හිණු Module Adaptations

- Service password reading used for making all DAS-related modules virgin
- Adaptation/Personalization and Activation of all DAS/FBS modules -Read/Save/Update/Transfer FBS Data
- Make each DAS/FBS module virgin

</> Advanced Coding

- Read/Save/Update/Transfer Coding (the only way to avoid online SCN coding)
- SCN coding via OBDII
- CPC modifications via OBDII VMAX limiter removal, Exhaust flaps adjustment, Torque limiter adjustment via OBDII
- Enable Video in Motion via OBDII
- Mercedes-Benz eVito Speed Limit calibration via OBDII

Cluster recalibration for vehicles via OBDII (up to 2014)

times Service Functions

- ESL and 7G Tronic Reset via OBDII
- ASSYST and ASSYST PLUS
- SBC Counter reset via OBDII
