Carmon

by Abrites

Fleet Management Reimagined

The CARMON fleet management system offers you detailed information about your fleet's health, allows you access to real-time data, analytics and remote diagnostics.

Detect deterioration of operating parameters and notify of possible failures, before they actually happen.

One Platform

to uncover, resolve and prevent possible threats and issues for the fleet!
CARMON reduces downtime and costs, ensuring efficiency regardless of your fleet's location!

Real-Time Alerts

Real-Time GPS Tracking

Modular System

Data Reports

The agile CARMON system excels in providing comprehensive fleet management. Tailored to diverse transport vehicles, it offers customization based on customer preferences. This versatile system ensures real-time insights into your fleet health, along with analytics and remote diagnostics, empowering efficient decision-making.

Remote diagnostics

With CARMON you can run remote diagnostics in order to discover possible errors and issues and prevent any threats and unnecessary expenses.

Maximum optimisation

CARMON offers detailed information on fuel consumption, energy saving and range improvement of your fleet, which allows maximum optimisation of company resources.

Analytics and security

CARMON provides access to analytical and safety information, such as driver behaviour and profile, which enables management to take data-driven decisions and reduce costs and risk.

Reducing costs and downtime

CARMON gives you the opportunity to eliminate unexpected expenses, which can stem from vehicle diagnostic trouble codes, risky driving and fuel theft. With your access to information and remote diagnostics 24/7, you will know your fleet and manage it better!

Predictive maintenance

Being able to foresee possible threats and detect trouble codes, gives you ultimate advantage when it comes to maintenance. Diminish unplanned maintenance with CARMON!

Fuel theft protection

One more way to optimise your fleet management is to reduce the risk of fuel theft and prevent it. The CARMON ecosystem provides a user-friendly way to monitor fuel consumption and improve security.

Know Your Fleet Better!
