

VEHICLE INSPECTION KIT

All-in-one mobile vehicle inspection kit for professionals!

PRODUCT DESCRIPTION

The Vehicle Inspection Kit brings together the VIN Reader and Key Inspector — two professional verification tools in one solution. Read VINs and mileage stored in multiple vehicle modules, decode the data inside vehicle keys, and generate comprehensive reports for law enforcement, insurance, dealerships, and inspection professionals.

WHAT SETS VIK APART

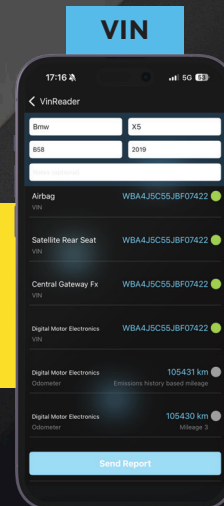

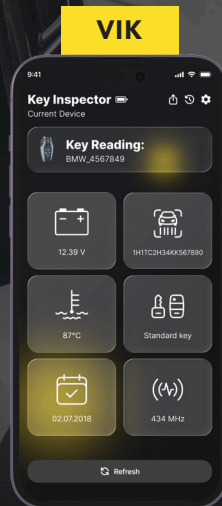

Two Independent Evidence Sources. One Complete Verification. VIN Reader pulls from control units, Key Inspector reads the key — a source the vehicle can't alter.

Match = Confidence
Mismatch = a finding worth documenting

HARDWARE INCLUDED IN THE KIT

PROTAG

Key and transponder reader

MODI / VIN Reader

Handheld OBD vehicle scanner

Abrites Tough Case

Compact and durable case

VIN READER

VIN & Odometer Verification
for Professionals

PRODUCT DESCRIPTION

The VIN Reader provides fast, accurate access to vehicle identification numbers and mileage stored in multiple modules, with the ability to generate comprehensive reports for law enforcement, insurance, dealerships, workshops, and vehicle owners.

WHAT SETS VIN READER APART:

The VIN Reader App enables fast, module-level VIN and mileage verification directly from the vehicle. It extracts VIN data from multiple control units, compares stored odometer values, and identifies inconsistencies that may indicate tampering. Results are structured into exportable reports, supporting professional inspections, sales decisions, and compliance workflows.
